PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience developing and deploying full-stack applications including hotel booking, CRM, and AI-powered web platforms. Skilled in React.js, Node.js, Express.js, MongoDB, RESTful APIs, JWT authentication, and responsive design. Strong problem-solving abilities with consistent practice in Data Structures and Algorithms and a passion for building scalable software products.

SKILLS

Programming Languages :	JavaScript (ES6+), Java, Python
Frontend Development:	React.js, HTML5, CSS3, Bootstrap, Responsive Web Design
Backend Development:	Node.js, Express.js, RESTful APIs, JWT Authentication
Database:	MongoDB, Mongoose, MySQL
Tools:	Git, GitHub, Postman, VS Code, Vercel, Render
Core Concepts:	Data Structures Algorithms, Authentication, Authorization, MVC Architecture

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology	2023 – 2027
Raipur Institute of Technology, Raipur, Chhattisgarh	
CGPA: 7.5/10	

Higher Secondary (Class XII)	2021 – 2023
Rajkiyakrit Uchch Vidyalaya Abhudaynagar, Banka, Bihar	
Percentage: 70.8%	

PROJECTS

Stayo – Full Stack Hotel Booking Platform	GitHub — Live
Built a full-stack hotel booking application using React.js, Node.js, Express.js, and MongoDB, allowing users to browse properties and manage bookings efficiently. Developed RESTful APIs for property listings, booking management, and user operations while implementing secure authentication and authorization. Designed a responsive interface and optimized database interactions using MongoDB and Mongoose.	

Thumblify – AI Thumbnail Generator	GitHub — Live
Developed an AI-powered thumbnail generation platform using React.js, Node.js, Express.js, and MongoDB, enabling users to create custom thumbnails from text prompts. Integrated AI image generation APIs and implemented JWT-based authentication for secure user access. Built RESTful APIs for user and thumbnail management, designed a responsive user interface, and deployed the full-stack application on cloud platforms.	

Smart CRM – Lead Management Dashboard	GitHub — Live
Developed a full-stack CRM application using React.js, Node.js, Express.js, and MongoDB for lead management and customer tracking. Implemented secure authentication, RESTful APIs, CRUD operations, advanced search and filtering, and responsive dashboard interfaces. Integrated analytics with data visualization charts to monitor lead status, source performance, and business metrics.	

ACHIEVEMENTS

- Solved 60+ Data Structures & Algorithms problems and maintained consistent problem-solving practice.
- Developed and deployed 5+ web applications using the MERN stack, demonstrating experience in AI integration, CRM systems, authentication, RESTful APIs, and database management.
